CUSTOMIZATION

VISION

NATURE  
GREEN  
INNOVATION

# LONDON DESIGN FAIR

Two souls who live within us, two ways of living, two lifestyles that sometimes attract each other and sometimes are opposed but which are essential.

**Urban & Nature** become Vision through the creativity of Marco Poletti, Designer and Architect with an Italian DNA. Two worlds at the antipodes and at the same time complement each other the trend of the moment.

# URBAN

**Urban** presents itself with vibrant colors and strong contrasts. Cold tones that, lit by points of light of color, return a typically metropolitan fairy tale.

## NATURE

**Nature** comes to life and breathes in a space where materials and colors warm up the space and regenerate it with emotional colors.

Marco Poletti DNA MADE IN ITALY is a format born from an idea by Marco Poletti where the participating companies become partners and protagonists at the same time using unique synergies and commercial opportunities of the project.
